

RainGard™

Cherry Cracking Suppressant

BENEFITS

- This improved formula does not require a water softener as it is not affected by normal levels of Calcium Carbonates (below 900 ppm CaCO_3)
- It can be tank mixed with most commonly used pesticides. (See RainGard™ Label)
- There are no unsightly residues left on the fruit surface.
- Application of treatments is not restricted to the occurrence of rain.
- RainGard™ does not induce fruit dehydration nor does it hinder the natural process of photosynthesis.

PRINCIPAL USE

RainGard™ is a preharvest solution used to reduce cracking of cherries by 50% on average.

COMPOSITION

RainGard™ is a proprietary formula for preharvest use on cherries in the orchard. All components of this product are included or exempt from inclusion in EPA's Toxic Substances Control Act (TSCA) Chemical Substance Inventory.

DIRECTIONS

See product label for specific use direction, dilutions, and rates of application.

Pace International
Brings Innovative Solutions and Technologies to
Increase Efficiencies in Application Processes
with Unsurpassed Service Quality

The Leading Postharvest Specialist

Innovative Technologies
High Quality Products
Efficient Application Systems
Professional Services & Support
Global Experience & Research
