

Natural Shine™ 960

High Shine Carnauba Citrus Coating for Domestic and Export Use

BENEFITS

- High-Shine finish rivals that of any shellac
- Durable finish will not whiten under extreme conditions
- Allows fruit respiration—dramatically extending shelf-life
- Minimizes weight loss—keeping fruit hydrated and healthy looking longer

PRINCIPAL USE

Natural Shine 960 is a high-shine carnauba citrus pack wax that performs equally well in both export and domestic markets.

COMPOSITION

Natural Shine 960 is an emulsion of food-grade carnauba and resins that conforms with FDA regulations, 21 CFR, Part 172, for food-use coatings.

DIRECTIONS

Apply Natural Shine 960 to clean, dry fruit with at least 50 percent horsehair at a rate of 8-12,000 lbs of fruit per gallon of wax. Apply by spray or drip over brushes. Dry with heated air before handling.

See product label for specific use direction, dilutions, and rates of application.

FOR BEST RESULTS

Using a cleaner such as 180 Cleaner, EpiClean, or PacFoam Plus can dramatically improve coating attributes including: shine, durability, and leveling. Use of these cleaners is highly recommended to effectively prepare fruit surfaces for coating.
