

# Mineral XX

## High Strength Apple Cleaner for use in Dump Tanks to Remove Heavy Mineral Deposits

### BENEFITS

- Prepares fruit surface to accept wax coatings
- Permits even, lustrous coating application
- Requires no special equipment
- Contains corrosion inhibitors to eliminate need for stainless steel submersion tanks

### PRINCIPAL USE

Mineral-XX eliminates hard water mineral deposits, uneven natural wax patterns, and field debris from fruit surfaces. Excellent where overhead irrigation or cooling is used.

### COMPOSITION

Mineral-XX is made with phosphoric acid, citric acid, and surfactants that conform with FDA regulations, 21 CFR, Subpart D, Section 173.315, for washing fruits and vegetables.

### DIRECTIONS

Add 1 gallon of Mineral-XX for every 100 gallons of water in the initial fruit submersion tank. For best results, maintain a pH of 2–3, adding Mineral-XX as needed to lower pH. Allow fruit to float for 1 to 2 minutes, forcing them to spin or submerge so that both cuticle and stem ends are treated thoroughly.

See product label for specific use direction, dilutions, and rates of application.
