

# PrimaFresh® Ultra

## Ultra Shine, Superior Performance Carnauba Coating for Pome Fruit

### BENEFITS

- Formulated with carnauba wax to be very resistant to “whitening” caused by condensation following removal from cold storage
- Durable shine, in and out of storage
- High-gloss finish from a “ready to use” formulation, no dilution needed
- Fast drying

### PRINCIPAL USE

PrimaFresh® Ultra is a high-gloss carnauba emulsion for use as a postharvest coating on apples and fruit.

### COMPOSITION

PrimaFresh® Ultra is an emulsion of food-grade carnauba wax and shellac whose ingredients conform with FDA regulations, 21 CFR, Part 172, for food coatings.

### DIRECTIONS

Use at full strength. For best results apply directly to clean, dry fruit. Rinse coating application systems daily with potable water.

See product label for specific use direction, dilutions, and rates of application.

### FOR BEST RESULTS

Using a fruit cleaner such as Acidex, Field Clean, or Mineral-XX can dramatically improve coating attributes including: shine, durability, and leveling. Use of these cleaners is highly recommended to effectively prepare fruit surfaces for coating.
