

# PrimaFresh® Ultra 2000

## High Shine, Ultimate Performance Carnauba Coating for Pome Fruit

### BENEFITS

- The highest-gloss finish from a carnauba “ready-to-use” formulation.
- The result of more than 5 years of continuous emulsion technology research at Pace International laboratories.
- Faster drying, easier to use.
- Durable shine, in and out of short and long term storage.
- Excellent results on packing lines with less than optimal water elimination.
- High carnauba content provides extreme resistance to whitening.

### PRINCIPAL USE

PrimaFresh® Ultra 2000 is a high-gloss carnauba emulsion for use as a post-harvest coating of apples and other fruits when a long-lasting, non-whitening, and high shine coating is required.

### COMPOSITION

PrimaFresh® Ultra 2000 is an emulsion of food-grade carnauba wax and shellac whose ingredients conform with FDA regulations, 21 CFR, Part 172, for food coatings.

### DIRECTIONS

Use at full strength. For best results apply directly to clean, dry fruit. Rinse coating application systems daily with potable water. See product label for specific use direction, dilutions, and rates of application.

### FOR BEST RESULTS

Using a fruit cleaner such as Acidex, Field Clean, or Mineral-XX can dramatically improve coating attributes including: shine, durability, and leveling. Use of these cleaners is highly recommended to effectively prepare fruit surfaces for coating.
