

Opti-CAL™

Liquid Calcium for Postharvest Drenching of Apples

BENEFITS

- Effective against postharvest development of bitter pit
- Compatible with DPA
- Conveniently applied in standard drench system
- Safe to handle and apply to sensitive varieties such as Golden Delicious
- Buffered formulation of calcium chloride will not damage fruit if used according to label recommendations

PRINCIPAL USE

Opti-CAL™ is not a substitute for summer orchard applications such as Stopit, but a supplement to those sprays. Use is most efficient on fruit going into storage as movement of the calcium into fruit continues over time.

COMPOSITION

Opti-CAL™ is a 12.1% buffered calcium chloride liquid.

DIRECTIONS

May be used in combination with Shield DPA 15%, and Shield-Brite® Penbotec™.

See product label for specific use direction, dilutions, and rates of application.

Pace International
Brings Innovative Solutions and Technologies to
Increase Efficiencies in Application Processes
with Unsurpassed Service Quality

The Leading Postharvest Specialist

Innovative Technologies
High Quality Products
Efficient Application Systems
Professional Services & Support
Global Experience & Research
