

Raynox[®]

Apple Sunburn Protectant

BENEFITS

- Does not leave a visible residue, for easier color picking of fruit.
- Does not cause irritation to nasal passages or skin.
- Does not have negative effects on beneficial insects.
- Does not encourage “mite flare-ups”.
- Does not wash off easily or require re-application after an occurrence of rain.
- Does not leave residue in dump tanks that call for special disposal.
- Can also be used in conjunction with Evaporative Cooling (EC) systems to enhance their effectiveness.

PRINCIPAL USE

Raynox[®] is a preharvest solution used to protect apples against sunburn browning by 50% on average.

COMPOSITION

Raynox[®] is a proprietary carnauba based formula for preharvest use on apples in the orchard. All components of this product are included or exempt from inclusion in EPA's Toxic Substances Control Act (TSCA) Chemical Substance Inventory.

DIRECTIONS

See product label for specific use direction, dilutions, and rates of application.
