

# Semperfresh™

## Sucrose Ester Based Coating For Cherry Fruit Freshness

### BENEFITS

- Semperfresh™ inhibits water loss while allowing gas exchange between the fruit and its environment.
- Reduces weight loss and excess respiration, resulting in firmer cherries with less pitting.
- Cherry stems stay greener longer due to greater moisture retention.
- Gives sheen to cherries without leaving an oily or greasy film on fruit.
- Widely used in the fresh pear industry to reduce bruising, weight loss and preserve green color and fruit pressure in storage without delaying normal ripening processes for consumers.

### PRINCIPAL USE

Semperfresh™ is a sucrose ester based coating used on cherries and pears to control weight loss and excess respiration, retain moisture and preserve natural color of fruit.

### COMPOSITION

Semperfresh™ is accepted by the USDA, the food additive laws of the EU and the Ministry of Health and Human Welfare in Japan.

### DIRECTIONS

Semperfresh™ is can be applied in a dip tank, flume, drench, or spray application and can be mixed with fungicides.

See product label for specific use direction, dilutions, and rates of application.

**Pace International  
Brings Innovative Solutions and Technologies to  
Increase Efficiencies in Application Processes
