

# Biox™-C

## Organic Potato Sprout Inhibitor applied by Thermofogging

### BENEFITS

- A natural, organically certified clove oil formula
- Exempt from EPA residue tolerance
- Does not have adverse effects on wound healing or fry color
- Does not leave a residual taste on potatoes
- Controls sprouts better than line treatments of CIPC E.C.
- Can be reapplied solely or in combination with CIPC for long-term sprout control
- Is effective to treat silver scurf disease on stored potatoes
- Certified applicators are trained to provide unique thermofogging techniques to ensure maximum results

### PRINCIPAL USE

Biox™-C is an organic certified clove oil (Eugenol) based solution to be applied by certified applicators trained to provide unique thermofogging techniques to ensure successful suppression of potatoe sprouts from growing while in long-term storage.

### COMPOSITION

Biox™-C is a formulation with 100% clove oil (Eugenol) as active ingredient.

### DIRECTIONS

See product label for specific use directions, dilutions, and rates of application.
