

Biox™-COMBO

Liquid CIPC/Clove Oil Combination Potato Sprout Inhibitor by Thermofogging

BENEFITS

- Ready to use liquid formulation of CIPC for easy application by thermofogging
- Synergistic effect of 2 modes of action: sprout killing power of clove oil (Eugenol) in combination with the growth inhibiting effect of CIPC
- Superior short, mid and long-term potato sprout control with a combination of 2 proven effective active ingredients: CIPC & Clove oil
- Can be reapplied solely or combined with Biox™-C for a long-term sprout control program
- Used by Certified Applicators implementing the latest, state of the art, thermofogging techniques, for improved distribution in the pile and maximized efficacy.

PRINCIPAL USE

Biox™-COMBO is a formulat made by a combination of liquid CIPC and clove oil to be applied by certified applicators trained to provide unique thermofogging techniques to ensure successful suppression of potatoe sprouts from growing while in long-term storage.

COMPOSITION

Biox™-COMBO is a combined formula of liquid CIPC and clove oil (Eugenol) as active ingredients.

DIRECTIONS

See product label for specific use directions, dilutions, and rates of application.
