**Shield-Brite® PAA 15.0**

A permeant acid based monosodium developed for Equipment Sanitizing, Disinfection and Baricada. Fung, Slime and Odor Control in Fruit and Vegetable Process Water Systems.

**ACTIVE INGREDIENTS:**
- Peracetic Acid: 15.0%
- Hydrogen Peroxide: 22.6%
- Sodium Hypochlorite: 0.00% (total inert ingredients)

**EPA Est. No.**
- 63838-CA-01: 63838-AR-001

**Total Inert Ingredients**
- 63.0%

**QUESTIONS?**

**IF INHALED**
- Remove to fresh air.
- Call a poison control center or doctor for treatment advice.

**IF IN EYES**
- Rinse eyes immediately with large amounts of water for 15 minutes if contact occurred.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

**IF ON SKIN OR CLOTHING**
- Remove contaminated clothing. Rinse skin with large amounts of water for 15 minutes if contact occurred.
- Call a poison control center or doctor for treatment advice.

**IF SWALLOWED**
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Call a poison control center or doctor immediately for treatment advice.

**Toxicity Information**

**Saniﬁcation of Conveyors and Equipment for Meat, Poultry, Seafood, Dairy, Fruit, Nuts and Vegetables**

This product is effective against the following: Salmonella enterica serovar Typhimurium and Staphylococcus aureus. To use this product, fill vessel containing a mixture of 0.75 fl. oz. of this product and 10 gallons of water (39.5 ppm active peracetic acid and 136-733 ppm active hydrogen peroxide). This can be accomplished by initially adding 3.8 fl. oz. per 10 gallons of water. The recommended concentration is between 30-300 ppm as peracetic acid (0.23-2.3 fl. oz. per 10 gallons of water). The final concentration necessary to accomplish the intended use will vary from plant-to-plant. The fruits and vegetables can be continuously sprayed or submerged (dipped) in the resulting solution. For use in the static or continuous sanitizing, washing or physical cleaning processes, it is recommended to apply this product during the washing, physical or mechanical cleaning processes. The concentration of 0.75 fl. oz. per 10 gallons of water is recommended to insure efficacy. A potable water rinse is not required. For use in the fogging system, the concentration of 0.75 fl. oz. per 10 gallons of water is recommended to_for various applications. The dilution rates of the resultant solution does not exceed those prescribed in this product is highly corrosive and should the solution (0.23-2.3 fl. oz per 10 gal of water). A 20 min application of this product is recommended to achieve the desired effectiveness.
