

PacRite® Oxy-Out

P O S T H A R V E S T

Peracetic Acid and Hypochlorites Neutralizer in Wash Water

For Agricultural Use Only

PRINCIPAL INGREDIENTS: Ethanol, 2-phenoxy-, and proprietary ingredients.

KEEP OUT OF REACH OF CHILDREN

HAZARD STATEMENTS

This chemical is considered non-hazardous by the 2012 OSHA Hazard Communication Standard (29 CFR 1910.1200).

PRECAUTIONARY STATEMENTS

Observe good industrial hygiene practices. Wear protective clothing, chemical resistant gloves, and safety glasses. Wash hands after handling.

FIRST AID STATEMENTS

IF ON SKIN: Wash skin with plenty of soap and water/shower. If skin irritation or rash occurs: Get medical advice/attention. Take off contaminated clothing. Wash contaminated clothing before reuse.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: get medical advice/attention.

IF SWALLOWED: Rinse mouth. Do not induce vomiting. If vomiting occurs naturally, have victim lean forward to reduce risk of aspiration. Never give anything by mouth if victim is unconscious or is convulsing. Obtain medical attention.

IF INHALED: If symptoms develop move victim to fresh air. If symptoms persist, obtain medical attention.

DIRECTIONS FOR USE: PacRite Oxy-Out is used to reduce oxidant levels in produce packing water systems. For every 100 gallons of water containing 100 ppm Sodium or Calcium hypochlorite, use 8 fl. oz. (236mL) and for every 100 gallons of water containing 80 ppm Peracetic Acid (PAA) use 6 fl. oz. (170mL).

Please note that the dosage rates vary with water quality and that treatment of water with PacRite Oxy-Out can lower the pH of the water. If a neutral pH is required for discharge, PacRite pH Increaser can be used to bring pH up to an acceptable level.

Fresh water rinse required for all fruit and vegetable contact.

STORAGE AND DISPOSAL

STORAGE: Store in a cool, dry, well-ventilated area away from direct sunlight. Do not allow product to freeze. Keep container upright to prevent leakage and avoid release into the environment. Absorb any spillage to prevent material damage. Store away from incompatible materials (see Section 10 of the SDS). Keep out of reach of children.

PRODUCT DISPOSAL: Wastes resulting from the use of this product must be disposed on site or in accordance with local/regional/national/ or international regulations.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill empty container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. Decontaminated and punctured containers may also be disposed of in a sanitary land fill.
