

# Digital Reporting System

Modernize your data management process

Pace provides several ways to capture, validate, and track data.

## 1. Receive and Review Pace InSite® Digital Reports

Receive an email with a PDF report of all maintenance and calibration information recorded by Pace Service Technicians. The easy-to-review report includes product settings, set points, and titration levels for control points.

**Service Report**

pH		6.78 2-7.1	6.88 2-7.1			
ORP		880 mV	898 850-950			
Temperature		63 F	63 F			
Cleaner				Acidex Duo		
pH at Application				2 pH		
pH on Fruit				4 pH		
Post Treatment Rinse?				Yes	No	
Paracetic Acid (PAA)					70 40-80	
Coating						PF 3000
Dryer Temperature						116 F
Application System						Pace Setter
Storage	CA					
Storage Room #	5B					

## 2. Access and Export Packing Line Data 24/7

Optionally, access your data on any device, anytime, anywhere through PaceInSite.com, a cloud-based data management software that allows you to export packing line data.

The screenshot shows the Pace InSite web interface. At the top, there are navigation links for Home, Favorites, Help Center, and Logout. The main content area displays a line chart for 'Cilrow Packers USA' showing pH levels over time from June 12 to June 28. Below the chart is a table with the following data:

Type	Component	Test Name	Avg	# Days	# Tests	# High	# Low	% in Range
High Pressure Washer	pH		6.9	61	12	0	0	100.00%
High Pressure Washer	ORP		838.2	61	12	0	0	100.00%
High Pressure Washer	Chlorine (Free)		48.0	61	12	0	0	100.00%

- 24/7 access to data
- Service reports
- Equipment settings
- Maintenance summaries
- Product usage history
- Charts and trends

### Greater Profitability

Increase margins with real-time analytics to inform day-to-day operations.

### Ease of Compliance

Organized, digital documentation ensure compliance standards are easily met.

## 3. Record and Customize Your Data

### Enter your own packinghouse data to track what you want, when you want

Pace InSite's™ platform uses Aliquot®\* to help operators upload data and reports electronically to your Pace InSite™ account and access them immediately, all in one place. With this new capability, you can enter the data that is relevant to your facilities during the time frame you want.

### View Historical Data

Upload reports more regularly and experience the benefits of a larger, more representative set of data depicting the day-to-day operations of your facility.

### Maximize Efficiencies

Utilize Pace InSite analytic tools with your data to increase efficiency on your packing line. Identify and react to trends in your packing operation.

### Enhance Compliance

Enhance Food Safety to ensure all compliance standards are being met. Quickly and easily check the compliance for critical Pace (sanitation/food safety) products such as Accu-Tab Chlorine and Shield-Brite PAA.

### Enhanced Features

- User-entered reports
- Centralized, in-the-field documentation
- Dive deeper into your packing line measurements
